</tr>
<tr>
<td>Pencil</td>
<td></td>
</tr>
<tr>
<td>Drill and Drill Bits</td>
<td>Bit Sizes: ½&quot;, 1&quot;</td>
</tr>
<tr>
<td>Hole Saws</td>
<td>1&quot;, 2½&quot;</td>
</tr>
<tr>
<td>Chisel</td>
<td></td>
</tr>
<tr>
<td>Hammer</td>
<td></td>
</tr>
</tbody>
</table>

### Measurement Instructions

1. **Measure door thickness.**
   - If the door is thinner than 1½” or thicker than 1¾”, then the lock will not fit properly on the door.
   - A thick door kit is used to fit the Schlage Encode to doors that are between 1¾” and 2½” thick.
   - **A thick door kit is available from Product Support at (888) 805-9837**

2. **Measure the backset.**
   - If existing backset is not 2½” or 2¾”, then the lock will not fit properly on the door.

3. **Measure the hole sizes.**
   - If hole sizes are larger than those shown, then the lock will not fit properly on the door. If hole sizes are smaller than those shown, see steps 3b and 3c.

   - **3b If necessary, enlarge hole in door face.**
     - 2½” Hole Saw

   - **3c If necessary, enlarge hole in door edge.**
     - 1” Drill Bit or Hole Saw
4 Check the door jamb.
4a Place new strike and reinforcement plate against the door jamb. If these do not fit properly, see steps 4b and 4c.

4b If correction is necessary, trace faceplate and mark holes.

4c If necessary, use chisel, hammer and drill to correct door jamb preparation.
